

Class Actions and Group Litigation

Recent surveys confirm that the most important trend in corporate litigation lies in class actions. The number of class actions filed is on the rise and spreading across industries, and around the world.

Our world-class Class Action team defeats class actions by integrating peerless class action experience with deep regulatory and industry knowledge of frequently targeted sectors. Our track record speaks for itself. We secure the most advantageous forums in proceedings before the Joint Panel on Multidistrict Litigation, combat adverse publicity, achieve early dismissals, defeat class certification, and, on the rare occasion when class claims survive other challenges, defeat class claims at trial.

Because we understand the key issues that commonly arise in major cases, we can minimize the burden of discovery and coordinate multijurisdictional class and group actions. With our broad national and international footprint, you have access to a coordinated team to handle multijurisdictional disputes seamlessly across multiple forums. We have experience counseling our clients on the latest legislative developments and helping them prepare for emerging litigation risks, domestic and international issues.

Due to our international expertise clients often turn to us as coordinated counsel for complex litigation with class and multi-party actions pending in several
