

Classified Information, Security Clearance Counseling and Appeals, Foreign Ownership Control, and Influence Mitigation

Foreign-owned companies seeking to do classified national security work for the U.S. government face unique challenges. Have you mitigated foreign ownership and control so as to be eligible for this work? If not, you could delay a deal or incur losses.

We assist non-U.S. companies in understanding the rules of the National Industrial Security Program (NISP) and the Committee on Foreign Investment in the United States (CFIUS).

We help foreign companies acquire U.S. defense companies, establish special security agreements, proxy boards, and other mitigation plans.

We also represent U.S. companies in transactions with foreign-owned companies related to security clearances.

We guide companies and individuals through the security clearance process. If you are denied a clearance, we can advise on appeal options.
