

Manufacturing

The sharp end of industry. Integrated globally and with all the right skills.

Raw materials – who selects, who sources? IP – have you got what you need and is it protected? Exclusivity – do you care? Equipment – who pays and maintains? Development – a new build? Environment – what's the impact? Regulation – who's responsible? International – will customs, tax, or sanctions bite? Continuity – how much does it matter? Defects – how to prevent them and manage liabilities?

The lawyers at Hogan Lovells have the answers.
