

## Oil and Gas: Exploration and Production

Exploration and production (E&P) companies face a unique set of business issues. At Hogan Lovells, we use our knowledge of local markets and familiarity with international best practices to bring you practical solutions. Whether you have a complex transaction or project, need to navigate regulations, resolve a contentious dispute, or protect your next-generation drilling technology, we help you stay on top of risks and opportunities.

Conventional or unconventional, onshore or offshore, we can identify where problems might arise and provide solutions. Our strong technical background and long history in the E&P sector allows us to develop industry-leading solutions for clients.

Our oil and gas team is truly global, enabling us to bring you legal solutions wherever your upstream business may be.

### Representative experience

Sole project counsel on the US\$45bn Shah Deniz Project, advising on the gas value chain from Azerbaijan to Italy.

Advised ExxonMobil on the US\$1.75bn sale of all North Sea assets to Apache North Sea Ltd.
