

Sustainable Finance & Investment

We are a multidisciplinary global team of lawyers committed to supporting clients, from both a transactional and a regulatory perspective, by delivering the tools, products and solutions required to help clients overcome challenges and take advantage of the many opportunities in this rapidly evolving sector.

In this relatively new and rapidly developing area, innovation is a core part of the strategy and the team meets regularly in order to discuss and design new methods to help clients achieve their sustainability-related and financial objectives.

Against this backdrop, we highlight the importance of UN Sustainable Development Goal #17. In order to mobilise capital and create an efficient, scalable sustainable finance ecosystem, partnerships and collaboration are crucial. Our lawyers are tasked with servicing our clients but also contributing to the development of the sector. We have collaborated on industry initiatives globally with the Loan Markets Association, Borsa Italiana, ISDA, GBBC Digital Finance, European Leveraged Finance Association, UN Global Compact and others.

On sustainability strategy, product development, transactions and risk, we offer innovative solutions combining market intelligence, guidance, legal expertise, project management and strategic alignment to facilitate our clients' business. An important part of
