

Mark Crossley

Counsel Knowledge Lawyer
London

Biography

Having trained and worked as a Magic Circle firm construction lawyer for seven years, Mark joined as our construction and engineering professional support lawyer in 2008.

A lover of poetry and speaker of Japanese and three European languages, Mark uses self-deprecating humour and empathy to create engaging training and guidance notes. He warmly and succinctly shares the range of his legal and industry knowledge, from general updates to detailed discussions on specific areas, telling clients what they really need to know.

Mark's friendly and open manner means clients enjoy working with him to devise relevant training sessions.

Representative experience

Before taking on his current role, Mark drafted and negotiated contracts and resolved disputes for clients working on landmark commercial buildings and arts projects.
