

Autumn 2019

The Technology, Media and Telecommunications team at Hogan Lovells introduce the Autumn edition of the Global Media, Technology and Communications Quarterly.

In this edition we survey the latest legal and regulatory developments across the global media and communications industry, from the arrival of 5G, to the growth of esports. We also carried out a global study on digital regulation, monitoring legislative initiatives concerning tech companies in 16 jurisdictions over the first half of 2019. Look out for our report later this month.
