

Sabrina Smyczek

Patent Attorney
Dusseldorf

Biography

Sabrina Smyczek is a fully qualified German Patent Attorney and is completing her training to become a European Patent Attorney with us. She advises clients in almost all technical fields of patent law with a focus on patent infringement and validity proceedings.

She combines comprehensive scientific knowledge and deep understanding of complex technical issues with legal expertise in the field of intellectual property law. She supports national and international clients in litigation proceedings and provides her technical expertise to the attorneys-at-law at our firm.

In particular, Sabrina has extensive patent law experience in the fields of information and telecommunication technology, semiconductor technology, automotive technology and special mechanical engineering.

Sabrina studied physics at the RWTH Aachen University and specialised in the field of medical physics in her master's degree. She wrote her Master's thesis in the field of radiation therapy at the West German Proton Therapy Centre in Essen (WPE).
